

Stained and Decorative Glass

This book traces the history of glass in its architectural environment from the earliest surviving examples in 11th century cathedrals to the work of modern designers and architects. The author explores the first flowering of stained glass in medieval times, and the technical virtuosity of the craftsmen who created the jewel like selected colours of the great windows that still illuminate the dark interiors of European cathedrals and churches. From gothic revival to William Morris and the Arts and Crafts movement there is something for everybody to enjoy.
